(Contains public policies adopted through October, 2019)

Last updated January 14, 2020

Florida Medical Association
1430 Piedmont Dr., East
Tallahassee, FL 32308
FOREWORD

The FMA Public Policy Compendium provides a listing of the Florida Medical Association’s policy positions adopted by the FMA House of Delegates and FMA Board of Governors. Each policy is affixed with a one letter prefix code (P) followed by a multi-digit number which is unique to the subject matter.

FMA councils and committees review seven year-old public policies on an annual basis and make recommendations to the House of Delegates to reaffirm or sunset. Policies that sunset are kept in a separate archive system for historical purposes.

An indexed table of contents is located on pages i-xxii.

P 30.000 ADVERTISING

P 30.001 PRINCIPLES GOVERNING ADVERTISING IN ALL PUBLICATIONS OF THE FLORIDA MEDICAL ASSOCIATION
The Florida Medical Association (FMA) seeks to promote the science and art of medicine and the betterment of public health. In serving these aims, the FMA communicates regularly with the members of the medical profession, with professional persons in allied fields, and with the public. A substantial part of this communication is carried out through the regular production and distribution of its publications. The appearance of advertising in FMA is not an FMA guarantee or endorsement of the product or service. The fact that an advertisement for a product, service or company has appeared in the FMA publication shall not be referred to in collateral advertising. As a matter of policy, the FMA will sell advertising space in its publications when (1) the buyer believes purchase of such space represents a sound expenditure, and (2) the inclusion of advertising material does not interfere with the purpose of the publication. These principles are applied by the FMA in determining the eligibility of products and services for advertising in FMA publications. The FMA reserves the right to refuse advertising in any of its publications which it considers to contradict or contravene in any manner the goals and purposes of the FMA as set forth in the Association's Bylaws. - On any future reorganization plan in which the Department of Health is proposed to be amalgamated with other State Agencies, that the Secretary of this newly created Department must be a physician licensed under F.S. 458 or F.S 459;
- The present Division of Medical Quality Assurance (MQA) in the Department of Health be maintained in its present organizational format and not be transferred to another State Agency such as but not limited to the Department of Business and Professional regulation;
- That the position of the present statutorily mandated Deputy Secretary for Children’s Medical Services and Deputy State Health Officer for Children be maintained with a realignment of the children’s health mission in any reorganizational plan and that this positions be filled as soon as feasible;
- That the present Children’s Medical Services (CMS) Network, physician led and directed, should be maintained in the Department of Health and not outsourced to the Agency for Health Care Administration in which physician influence and delivery of quality enhanced child health programs would presumably be markedly diluted;
- Maintaining and expanding the present Children’s Medical Services provider service network for both specialty and primary care should remain a top priority under physician direction to allow them parity in competing with traditional health maintenance organizations (HMO) which frequently have little or no direct physician involvement or direction and depend on rudimentary quality child health measures not comparable with the Children’s Medical Services Network; and
- The present physician directed Child Protection Teams (CPT’s) under Children’s Medical Services deal with multi-faceted problems and challenges of child abuse and should remain with adequate recurring funding in the Department of Health and not be transferred as proposed to the Department of Children and Families (DCF).

P 175.000 ETHICS – MEDICAL

P 175.001 PATIENT FEE DISPUTES  
The Florida Medical Association adopts the following policy on patient fee dispute complaints: (1) Under the direction of the Judicial Council, each county medical society would be encouraged to review patient fee
complaints/disputes perhaps through a subcommittee of their grievance committee or through a separate committee established for that purpose; (2) All fee disputes would be handled under the following essential principles: a. All proceedings are voluntary to all parties. b. All deliberations of the fee dispute panels and their decision would be confidential to the highest degree and any information or records would be available only to the parties to the proceeding, the grievance committee, and the Judicial Council. c. The decision of the committees would be advisory only. Neither party would be required by organized medicine to follow the decision. The parties would not be precluded, however, from independently and privately agreeing to be bound by the decision; (3) The make-up of the fee dispute committee would be left up to the decision of each county medical society. The Judicial Council suggests consideration of a small committee of perhaps three members which would include a lay person; (4) When a complaint involves both fee and non-fee issues, the fee committee would advise the grievance committee regarding its position on the issues. The grievance committee would issue a combined opinion on the complaint; (5) Notwithstanding paragraph (2) above, if the fee dispute committee found that charges were so exorbitant as to be unethical, then the committee could refer the entire case to the county medical society grievance committee; (6) The Judicial Council will prepare model step-by-step complaints under these guidelines. (*BOG June 1988*) (*Reaffirmed HOD 1998*) (*Reaffirmed HOD 2008*) (*Reaffirmed HOD 2017*)

**P 175.002 CAPITAL PUNISHMENT**
The Florida Medical Association supports the position of the American Medical Association’s Council on Ethical and Judicial Affairs regarding capital punishment as follows: An individual’s opinion on capital punishment is the personal, moral decision of the individual. A physician, as a member of a profession dedicated to preserving life when there is hope of doing so, should not be a participant in a legally authorized execution. A physician may make a determination or certification of death as currently provided by law in any situation. (*BOG October 1991*) (*Reaffirmed HOD 2002*) (*Reaffirmed HOD 2011*)

**P 175.003 CODE OF ETHICS**
The Florida Medical Association (FMA) is committed to the principles of medical ethics and requires that all members agree and comply with the American Medical Association’s (AMA’s) and FMA’s Principles of Medical Ethics. **P 175.006 DENOUNCING THE UNETHICAL PRACTICE OF CREATING CRYOPRESERVED HUMAN EMBRYO BANKS BY CORPORATE ENTITIES**
The Florida Medical Association (FMA) supports legislation that ensures human embryos shall not be created by fertilizing donor oocytes with donor sperm except at the specific request of a patient or patients who intend to use such embryos for his/her/their own treatment; and further, understanding that only patients should be responsible for the disposition decisions of the human embryos they create, the FMA strongly denounces the purposeful creation of banks of cryopreserved human embryos, through the combination of donated oocytes and donated sperm, at the request of an in vitro fertilization facility or parent organization
rather than patients themselves; and further, understanding that embryo donation, as is defined by the American Society for Reproductive Medicine, is the donation of cryopreserved embryos from the patients that created them, calling human embryos that are created through the combination of donated oocytes with donated sperm “donated embryos,” at the direction of an in vitro fertilization facility and not patients, misleads the infertile patient into believing said embryos are actually donated by patients, should be considered false advertising, fundamentally unethical and is therefore denounced by the FMA. (Res 15-103, HOD 2015)

P 175.007 HEALTH CARE RIGHTS OF CONSCIENCE
The Florida Medical Association advocates for healthcare rights of conscience for physicians and hereby acknowledges that it is a basic right of individual physicians to freely exercise their right to conscientious objection in their healthcare work without fear of coercion or penalty, and further supports healthcare rights of conscience legislation to protect physicians from coercion, imposition and any type of penalty by governmental and other outside regulatory measures that would violate the professional integrity of physicians and endanger their right to practice their chosen field of medicine. P 185.012 MEDICAL EXPERT TESTIMONY AND THE “STANDARD OF CARE”
Following are Guidelines for Expert Witness Testimony for FMA members who render any type of expert witness testimony: (1) The physician must be honest and trustworthy when writing reports, completing or signing forms, or providing evidence in litigation or other formal inquiries. The physician must take reasonable steps to verify any statement before signing a document. (2) The physician’s review of medical facts must be thorough, fair, and impartial and must not exclude any relevant information. It must not be biased to create a view favoring the plaintiff, the government, or the defendant. The goal of a physician testifying in any judicial proceeding should be to provide testimony that is complete, objective, and helpful to a just resolution of the proceeding. (3) The physician must have experience and knowledge in the areas of clinical medicine that enable him or her to testify about the standards of care that applied at the time of the occurrence that is the subject of the legal action. (4) The physician’s testimony must reflect an evaluation of performance in light of generally accepted standards, neither condemning performance that falls within generally accepted practice standards nor endorsing or condoning performance that falls below these standards. (5) The physician must make every effort to assess the relationship of the alleged substandard practice to the outcome, because deviation from a practice standard is not always substandard care or causally related to a bad outcome. (6) The physician shall identify as such any personal opinions that vary
significantly from generally accepted medical practice. (7) The physician must be prepared to have testimony given in any judicial proceeding subjected to peer review by the Expert Witness Committee or by any other institution or professional organization to which the physician belongs. (8) The physician shall not accept a contingency fee for providing expert medical opinion services. (9) Charges for medical expert opinion services shall be reasonable and commensurate with the time and effort given to preparing and providing those services. P 215.000  HEALTH DISPARITIES

P 220.000  HEALTH INFORMATION TECHNOLOGY

P 220.001  MEDICAL INFORMATION TECHNOLOGY
The Florida Medical Association (FMA) recognizes the potential substantial advantages of medical information technology systems to improve patient care, and supports the ongoing effort to appropriately implement those systems. It is the policy of the FMA that all systems implemented, and any government or hospital regulations that affect those systems, must 1) promote optimal patient care delivery; 2) protect patient rights; 3) benefit as many patients as possible; and 4) anticipate future advances in technology. To do this, those systems and regulations must meet the following guidelines:

Optimal Patient Care Delivery: All medical information technology systems must be established and maintained with the delivery of optimal patient care as the primary objective; the physician-patient relationship is central to providing optimal patient care and all systems must preserve physicians’ responsibility for patient care decisions based on their education and experience; medical information systems are considered supporting technology to assist the physician’s care of the patient; physicians are responsible for providing optimal patient care, which may be improved, but is not dependent upon a medical information system; to protect the ability to provide optimal patient care, any system considered for implementation must be shown through adequate demonstration projects to — 1) work 2) be cost effective 3) not impose undue financial strains on practitioners 4) not unnecessarily increase physician workload and 5) benefit patient care; to protect the ability to provide optimal patient care, physicians and/or their office staffs must be allowed sufficient time to successfully adopt any new technology system; hospital-based systems must enhance the ability of physicians and nurses to provide patient care, and not be implemented just for cost considerations or hospital convenience; hospital-based systems must enhance the role of physicians and nurses in providing direct patient care, and not just shift clerical and administrative duties to physicians and/or the nursing staff; to minimize the potential for adverse patient care consequences, hospitals must obtain input from the medical and nursing staff before implementing medical information technology decisions.

Patients Rights: All systems must ensure that the physician caring for the patient retain primary control and responsibility over patient care information, subject to the rights of patients to access and release their healthcare information; all systems must secure the privacy of patient care information, including the right to privacy relating to government and insurance entities, subject to the right of the patient to release their
healthcare information. **Patient Access To New Technology**: To encourage the dissemination of medical information technology, systems must be developed and offered that are affordable for small office practices; to ensure that the financial burden of new technology does not slow its implementation, there must be no unfunded government mandates; to ensure all patients ultimately have access to new technology innovations, systems must be developed using accepted standards to allow for the sharing of patient care information between all providers and clinical entities, and must be developed irrespective of specific systems or vendors. **Anticipate Future Advances in Technology**: Systems must be developed to be flexible and adaptable, in anticipation of future advances in technology, and/or the potential of a future electronic information infrastructure; systems must easily interface with all other systems; further, the cost of system interfaces must not hinder the dissemination of technology designed to improve patient care delivery. *(BOG November 2003)(Reaffirmed HOD 2011) (Reaffirmed Res 15-406, BOG January 2016)*

other out-of-pocket costs that enrollees may incur.
3. Insurers must maintain at all times an accurate and complete list of all in-network physicians. This
information shall be contained in a public database, which must be easily accessible online by health care
consumers.
4. Prior to scheduled procedures, insurers must provide enrollees with reasonable and timely access to in-
network physicians.
5. Patients who are seeking emergency care should be protected under the “prudent layperson” legal standard
as established in state and federal law, without regard to prior authorization or retrospective denial for
services after emergency care is rendered.
6. Out-of-network payments must not be based on a contrived Medicare rate or a rate under the control of the
insurance company.
7. In lieu of balance billing of patients, an appropriate and fair minimum benefit standard for unexpected out-
of-network services should be created. The minimum benefit standard should accurately reflect reasonable
physician charges, such as through the establishment of a charge-based reimbursement schedule connected to
an independently recognized and verified database that is geographically specific, completely transparent,
and independent of the control of either payers or providers.
8. The primary determinant in any provider-carrier dispute resolution process should be based on the usual
and customary charges from an independently recognized and verified database that is geographically
specific, completely transparent, and independent of the control of either payers or providers.

The FMA should establish a database of physician underpayments based upon carriers' unilateral

P 450.008 STAFF PRIVILEGES FOR NON-PHYSICIANS

P 450.009 ENCROACHMENT OF NONPHYSICIANS ON THE PRACTICE OF MEDICINE
The Florida Medical Association (FMA) adopts the following statement on encroachment of non-physicians on the practice of medicine: "The decades since World War II have seen a very marked increase in the number of allied health professionals. These professionals include psychologists, optometrists, nurse practitioners, physical therapists and technicians and others. Allied health professionals possess very important skills in their respective fields and have made and can make lasting contributions to the total picture of health care. The FMA has no quarrel with the activities of allied health professionals when they act within the scope of their training and expertise. However, the FMA is concerned about repeated efforts by non-physician groups to take over functions properly restricted to doctors of medicine or osteopathy. One such area of encroachment is in the prescription of diagnostic and therapeutic drugs where both optometrists and pharmacists have recently obtained limited rights by legislative action which, in our opinion, is not justified by the training and experience of these practitioners and will be detrimental to the health of patients whom they attempt to treat. Other groups, such as psychologists, are mounting determined pushes to obtain admitting privileges to acute care hospitals despite the fact that they are not properly trained to direct hospital care. In the opinion of the FMA, only doctors of medicine or osteopathy have the proper background of training and experience to qualify physicians to prescribe drugs and assume overall responsibility for hospitalized patients. Allied health professionals often provide invaluable assistance in the care of hospitalized patients, but they do not have the background to qualify them to attempt total care of such patients. The FMA will cooperate in every way possible with allied health professionals to the end of improving total health care, but will resist all attempts by allied health professionals to assume the responsibilities of physicians without possessing the qualifications of doctors of medicine or osteopathy. The FMA will continue to oppose efforts by chiropractors and other less well trained groups or individuals that

P 450.027  FMA POSITION ON SCOPE OF PRACTICE

*The report provides that the FMA address scope issues within a framework that can be applied in a variety of circumstances and further help the FMA and other groups to achieve a common understanding of how the FMA will approach scope issues in the future and what is expected of groups who may seek the FMA’s assistance on an issue. This approach allows maximum flexibility in the dynamic legislative, political and economic environment and does not allow any single issue to define the FMA. The FMA continues its efforts to promote the concept of physician-directed care that ensures patient safety while promoting access to care. As long as physicians remain the leader of the health care team, it may be appropriate for the FMA and specialty societies to consider, on a case-by-case basis, scope of practice expansions when sufficiently protective of patient safety and improved patient access.

P 450.028  DOCTOR OF NURSING PRACTICE (DNP)
Due to the extreme likelihood that patients treated by a Doctor of Nursing Practice (DNP) will be misled into thinking that their “doctor” is a physician, the FMA is directed to introduce legislation mandating that all persons other than M.D.s, D.O.s, dentists and chiropractors holding themselves out as “doctors” wear a
conspicuous name tag or signage which have letters no smaller than 4mm per letter and which fully spells out the exact name of their formal degree (Doctor of Nursing Practice, etc.) and that they further be required to orally state that they are not physicians with each and every encounter.  *(Amended Res 13-322, HOD 2013) (Reaffirmed HOD 2014)*

**P 450.030 THE “FOR ACCURACY AND ACCOUNTABILITY IN CLINICAL TITLES” (FACT) RESOLUTIONS**

1. Prevents Advanced Practice Registered Nurses and Physicians Assistants from using titles and descriptors that are not in line with their state licensure
2. Prevents Advanced Practice Registered Nurses and Physician Assistants from descriptors reserved for physicians, either in whole or in part (e.g., “nurse anesthesiologist”, “nurse cardiologist”, or “nurse dermatologist”)
3. Establish criminal and or civil penalties for such acts

**P 460.000 SURGERY**

**P 460.001 LASER SURGERY**
The Florida Medical Association supports working with the Florida Department of Health and the Florida Board of Medicine and any other appropriate state agency and the Florida State Legislature to define “laser surgery” as a surgical operation and that only practitioners appropriately trained in the use of lasers and licensed pursuant to Chapters 458, 459, 461 and 466 be allowed to utilize lasers in the treatment of human conditions, disorders, anomalies, dysfunction and disease. *(Res 96-56, C-11, HOD 1996) (Reaffirmed HOD 2006) (Reaffirmed HOD 2014)*
